

Most people don't realize,
80% of adults over 35
have gum disease.¹

Gum disease can be
harder to see,
than share.

SIMPLY PERIO®

Saliva Diagnostics made Simple.

Gum disease isn't always easy to see.

In fact, dangerous and damaging oral bacteria linked to serious and systemic health issues aren't easily detected in the vast majority of patients using only a visual exam.

Gum disease, also called periodontal disease, is the most undiagnosed & untreated disease with the highest impact to so many bodily systems and functions.

SimplyPERIO® testing, utilizing noninvasive saliva analysis, delivers the data backed understanding you and your dentist need to see the complete picture of the real bacteria party happening inside your mouth. Offering an actual opportunity to stop and even reverse disease progression.

- ✓ Get tested.
- ✓ Identify your real risk.
- ✓ Empower change.
